STUDENT LIFE

CAPE FEAR TECH. IS . . .

What is Cape Fear Tech.? It is more than a tall brick building on Front Street. It is a place where people come to learn, make new friends, and have some fun.

The time spent at Cape Fear Tech. can produce memories that remain in our hearts for a long time. Some may not be worth remembering, and most times are forgotten soon after we are gone. However, the good times seem to stay with us forever. Oh yes, we remember standing in line at registration and still not getting our classes, but what about the fun we had at the Fall and Spring Flings or the Christmas Program? However,

we know that the best memory of all was the day that our degree was finally ours.

From Freshman Orientation to Graduation, Cape Fear Tech. becomes a part of our lives, a very special part.

James Tallant

Student Thelma Bennett

Welding class

TEACHERS AND CLASSES

When it comes to the teachers here at Cape Fear Tech. we have the best possible.

These people work very hard to make our classes interesting and worthwhile, and we all know that an interesting class can make a world of difference in what we do or do not learn. Besides all of the hard work that

goes into planning our classes, our teachers spend hours of out-of-class time making sure we know what we are doing.

So students, when you have graduated and look back at your degree, give some thought to these people. Because if it were not for the teachers, you might not be where you are.

Joyce Thornton

Everyone's best friend, Santa

Watching for friends

AND REACHING GOALS

From the time we attend Freshman Orientation, we set in motion a process to reach the one goal for which we attend school here. It is a long process and sometimes the rewards are few, but in the end we all know it is worth it.

If you were to ask most students what Graduation meant to them, most would probably re-

ply, "to get out of this place". However, most of them do not realize that once they leave Cape Fear Tech. new goals have to be set. For instance, how far do they want to go with their career?

As you wait in line or in the audience, think about what goals you have or need to set for your future. Good luck!

Reminiscing

Together one last time

GET INVOLVED

Have you ever thought about how many ways that you can get involved here at Capr Fear Tech? Well, if you haven't, here are just a few.

First there is the Student Government Association. You can be a senator, join a committee, or just help out someone who is campaigning for an office.

Next there are sports. I'll bet that some of you didn't even know that we have basketball, softball, or even golf here. Well we do and you are welcome to

participate.

Last there are the games and clubs. There are three game rooms on the first floor and almost anytime you can find someone in them. As for the clubs, most of them are associated with the curriculums, so ask your instructors if you are interested.

If there is something you might be interested in don't just sit around, get up and do something about it.

A NEW LOOK

When you returned to school last fall, we are sure that you noticed something different about the first floor. Our Maintenance Staff spent a good part of the summer remodeling the cafeteria and fixing two new game rooms and a meeting room.

These men do a lot of things

around this school that go unnoticed most of the time. They keep our classrooms comfortable, the grounds well manicured, and a lot of little things that we never give a thought to.

Because these men do so much for this school; this page is for them.

TOM GREEN ANNUAL CHESS TOURNAMENT

IN DEDICATION DR. CLARENCE E. DODGENS

The 1984 edition of "The Bridge" is dedicated to a man who gave 19 years of his life to the betterment of Cape Fear Technical Institute. That man is Dr. Clarence E. Dodgens.

Dr. Dodgens was graduated from Limestone College with a B.A. Degree, then attended Gardner-Webb where he earned an Associate in Arts Degree. He received his Masters Degree in Occupational and Information Guidance from North Carolina State University and then went on to earn his Doctorate in Education, also from North Carolina State.

He joined the Cape Fear Tech Administration in 1964. He was named Vice-President in 1975, where he remained until his retirement on June 30, 1983.

Dr. Dodgens you are missed.

FROM THE EDITOR:

Well it is finally here, the end of another long school year. It also brings to a close a long year of putting together a special yearbook for the students here.

At this time I would like to thank the people who helped to put this book together. First are Nick Howard, Pete Clark, and Kathy Owens for their photography contributions. Next are Pat Roderick, Dale Roberts, and Pam Warner for selling advertisements. Also thanks go to David Gregory and the staff of Colorcraft for rushing through most of our picture orders. Last but certainly not least, a very special thank you goes to my two advisors, Mr. Charles Hunnicutt, and Mr. Carl Malpass, for without their help this book would not be possible.

As I said before this book is for you the student. I hope you enjoy it.

*BEST WISHES
TRECIA HOLDEN
EDITOR*
